

# OUR BUSINESS IS TAKING CARE OF YOUR BUSINESS

## WHAT

### WE DO

Accounting and bookkeeping

Corporate & individual tax returns

Sales tax returns

Payroll services and compliance

Company incorporation

Treasury functions

Cash flow projections

Budgeting and forecasting

## HOW

### WE DO

We discuss, understand and document our clients' requirements in detail before we initiate our services. Generally, we provide an initial client set up checklist to our clients for required set of information so that we get 360 degree view of our clients, their requirements and expectations. Our subject matter expert will review this information, formulate a plan and assign a team of individuals to deliver services based on client expectations.

We operate via our secure servers. We provide our clients multiple options to exchange information on a day-to-day basis. These options would include using a secured FTP site, using cloud servers or traditional remote desktop connections.

## WHY

### CHOOSE US

- Lower operations cost by up to 50%
- Improve process, productivity and profits
- Focus more on client relationship and services
- Move fixed costs to variable costs
- Quicker turnaround time
- Gain a competitive advantage by expanding your scope of services
- Reduce overheads of HR management
- Lower liability of IT systems and software maintenance
- Best access of technology and infrastructure through outsourcing
- Flexibility to scale the outsourced finance department
- Exercise control through predefined SLAs and KPIs
- Complete safety & security through a robust IT infrastructure
